

DIGITAL INDUSTRIES SOFTWARE

Simcenter FLOEFD extended design exploration module

Expanding CFD capabilities with design exploration and optimization

Benefits

- Expand CFD capabilities with design exploration and optimization
- Identify higher-performing families of designs
- Discover better designs faster
- Use simulation to drive innovation
- Minimize simulation time and cost

Summary

Simcenter™ FLOEFD™ software is award-winning front-loading computational fluid dynamics (CFD) software that works inside computer-aided design (CAD) to simulate fluid flow and heat transfer using 3D CAD models without the need for data translations or copies. Simcenter FLOEFD is part of the Siemens Xcelerator business platform of software, hardware and services.

With the module, you can extend the Simcenter FLOEFD parametric study and design comparison functions to drive innovation with design exploration, moving beyond troubleshooting and evaluating designs to discovering better designs faster.
